

Disposable Medical Supplies Product Guide

Backed by a team of skilled professionals and a network of trusted global partners, Elite ensures that healthcare institutions, clinics, and hospitals receive reliable, certified products that meet international standards.

At Dashmed, we believe in building long-term partnerships and delivering excellence in every aspect of our service from consultation and procurement to after-sales support and technical maintenance.

''

Elite is a leading provider of high-quality medical equipment and healthcare solutions, committed to advancing the standards of patient care across the region.

With a strong foundation built on integrity, innovation, and expertise, Elite specializes in the distribution and supply of cutting-edge medical devices, diagnostic tools, and hospital-grade technologies.

About us / Table of Contents

Backed by a team of skilled professionals and a network of trusted global partners, Elite ensures that healthcare institutions, clinics, and hospitals receive reliable, certified products that meet international standards. Our mission is to empower the medical community by delivering solutions that enhance efficiency, safety, and clinical outcomes.

At Elite, we believe in building long-term partnerships and delivering excellence in every aspect of our service from consultation and procurement to after-sales support and technical maintenance.

- 01 | Central Venous Catheter and hemodialysis catheter
- 02 | Gauze, Bandage, Cotton, Plaster, Fiberglass and tape
- 03 | Adhering Dressing
- 04 | Mask, Surgical Gown, Coverall Patient Coat
- 05 | Disposable Infusion Set and surgical items
- 06 | Gloves and other
- 07 | Lab Items
- 08 | Hemodialyzer

Central Venous Catheter

Disposable Central Venous Catheter
Antimicrobial Central Venous Catheter

Disposable Central Venous Catheter kit

FEATURES:

- The latex-free material provides excellent safety.
- Excellent radiopacity of the catheter makes it easy and safe for operation.
- Soft blue tip provides reduce harm to the vessel, makes it easy to entry into the puncture point.
- The patented design of the connector makes it smooth and firm, effectively prevent the product from infection, leakage and shedding.
- The transparent extension tubes with detachable clamps and printed marks allow to maintain the catheter away from the insertion site, reduce the risk of air embolism.
- Standard package and full package of the CVC Kit are available.

Standard Package:

Catheter (1)
Guide Wire (1)
Dilator (1)
Introducer Needle (0/1) Catheter Clamp (1)
Rigid Fastener (1)
Blue Introducer Syringe (0/1) Heparin Cap (1/2/3)
Stanch Clip (1/2/3)
Syringe (1/2)
Scalpel (1)

- 100% Cotton
- High absorbency and breathability material
- Sterile/unsterile are available
- Different mesh and packing are available

- 100% Cotton or 40gsm non woven
- Cotton yarn of 21's, 32's, 40's
- mesh of 22, 20, 18, 17 threads etc
- package: in 1's, 10's, 12's, etc packed in pouch, 10's, 12's, 36's/tin
- Colour: yellow and White
- box: 10, 20, pouches / box

CASTING TAPE,SPLINT
Characteristics:

- Lighter:** They are adopted by lighter texture fabric and net structure, and their weights are reduction of 30%-40%. The patient will feel very comfortable
- Better plasticity:** The materials used have good ductile strength. They can be fit closely to irregular body parts and have no folds. This avoids the loss of restoration and second dislocation after restoration in the shaping
- Better air permeability:** With the porous net structure, it makes this product ventilate better and let skins breathe freely
- Better X-ray radiolucency:** Under the normal circumstances, the photograph taken is very clear. The tube voltage is obviously lower and the time taken is shorter to greatly reduce the X-ray radiation to body
- More Eco-friendly:** The wastes can be burning up and eco-friendly to avoid environmental pollution
- Easier to remove:** We develop matched removing tool as below which is small noise, light, easier to remove and no potential risk. The Usage For Casting Tape
- Doctors wear latex gloves
- Put the cotton stockinette on injured area of the patient, and then wrap it up with cast padding
- Immerse the casting tape in the water temperature of 20-30°C for 20 seconds and squeeze it 4-6 times. After soakage, squeeze excess water
- Wrap spirally up injured part, and be overlapped the previous layer by one-half or two-thirds the width of the roll. Its degree of tightness should be appropriate in order to not affect the limb blood circulation. Usually 4-5 layers are for supporting part and 6-7 layers are for non supporting part
- Shaping as needed and make casting tape to be fit closely to limb external
- It begins to solidify after 3-5 minutes and reaches function strength after 10 minutes. The Usage For Splint
- Splint Roll is cut as per need, and the end of cut should be sealed with clip
- Immerse the casting tape in the water temperature of 25-30°C for 30 seconds and squeeze it 5-8 times. After soakage, squeeze excess water
- Be fit closely to the part needed to firm with the thicker side of padding cloth wrap with gauze bandage or elastic bandage to firm and shape
- It begins to curing after 3 minutes and reaches function strength after 30 minutes.

Note:

- When use casting tape, need to wear gloves;
- Please open one package every time and use it immediately;
- If it is leakage or hardened, please do not use it.
- It should be stored in the place of 15-30°C temperature, less than RH60% humidity and ventilation.

Silk Tape, Plastic Tin

Cloth Tape

Product description: It is composed of silk, medical hypo-allergenic adhesive and inner core, widely used in clinical departments.

Feature: A strong tape for affixing dressings

1. Sturdy rayon/acetate fabric helps secure dressings in place
2. Serrated edges facilitate tearing
3. Durable adhesion with minimal residue on skin
4. Water repellent and hypoallergenic

Available color: white and skin

Option: different size and color, Brand customization

Storage: the humidity cannot be over 80%, and temperature is (-5-30) °C

Shelf life: 2 year

ADHESIVE PLASTER

Surgical Tape ,(Paper Tape), Bulk Package

Paper Tape

Product description: It consists of non woven, medical hypo-allergenic adhesive and inner core, widely used in clinical departments.

Feature:

1. Gentle, air-permeable, non-woven material
2. Especially recommended for geriatric patients or others with fragile skin
3. Conforms and adhere even to damp skin
4. Secures lightweight dressing and tubing, ostomy pouches and facial dressings
5. Hypoallergenic

Available color: white and skin

Option: different size and color, Brand customization

Storage: the humidity cannot be over 80%, and temperature is (-5-30) °C

Shelf life: 2 years

ADHESIVE PLASTER

PE Tape ,Bulk Package

Transparent Tape

Product description: It is composed of PE film, medical hypo-allergenic adhesive and inner core, widely used in clinical departments.

Feature:

1. Clear, breathable, plastic material
2. Micro-perforation allows for bi-directional tearing
3. Excellent for IV sites and tubing retention
4. Hypoallergenic

Available color: Transparent

Option: different size and color, Brand customization

Storage: the humidity cannot be over 80%, and temperature is (-5-30) °C

Shelf life: 2 years

SELF ADHESIVE BANDAGE

Self Adhesive Elastic Bandage, Cotton Material

Self adhesive elastic bandage is an economical, hand tear, self adhesive elastic bandage. It is soft, easy applied, sticks only to itself and allows skin to breath. It can be used in many of the situations where you could use an elastic bandage. It is lighter and more conforming to your shape

Features:

1. Elastic Non-woven material or Elastic Cotton material
2. Sticks to itself, does not stick to hair, skin, clothing, no pins and clips needed
3. Soft, breathable and comfortable
4. Easy hand tear, no scissors needed
5. Provide light compression, apply properly to avoid cutting circulation
6. Stable and reliable cohesiveness
7. Constant unwinding tension
8. Good tensile strength
9. Competitively priced
10. Colour and size can follow customer's demand.
11. We can follow customer's demand to produce self-adhesive elastic bandage with double-layered non-woven fabric together with rubber.

PBT crepe & plain Cloth self-adhesive elastic bandage is kind of bandage consists of cotton, polyamide. They are extremely soft, breathable and comfortable, easy to apply and remove. Its cohesiveness greatly facilitates application.

Features:

1. Material: cotton and polyamide
2. Sticks to itself, does not stick to hair, skin, clothing, no pins and clips needed
3. Soft, breathable and comfortable
4. Provide light compression, apply properly to avoid cutting circulation
5. Stable and reliable cohesiveness
6. Constant unwinding tension
7. Colour and size can follow customer's demand.

SELF ADHESIVE BANDAGE

Self Adhesive Bandage, Pets Bandage,Non-woven

Description:

Hand-tear non-woven cohesive bandage; Length and width can be made as per request One color printing on fabric can be customized according to customer's idea

Benefits:

Print your logo on the fabric to present your company to all users impressively Print lovely pattern on the bandage to relax users Quality cohesive bandage performance Also for Pet Hospital/clinic

Application:

Securing pads and dressings, protective bandage Pressure bandage to promote circulation and healing Sprains and strains partial immobilization Post-operatively leg wrap

Caution: This product contains natural latex which may cause allergic reactions.

Self -Adhesive Gauze Bandage

Self adhesive gauze bandage is composed of pure cotton and natural rubber. It is widely used due to its character of convenient, self adhesive ,tear easily with no scissors feeling adhesive, no conglutination with fur or hair,no side-effect with the skin, no stimulation, breathe freely ,comfortableness, mangle on purpose, easy useand soon. Usage scope:

- 1.It is the traditional substitute of the bandage, it is applied to the medical treatment of fixing and wrapping.
2. Prepared for the accidental aid kit a n d war wound.
3. Used to protect the various training, match and sports.
4. Field operation occupational safety protection.
5. Family health self protection rescue.
6. Animal medical wrapping and animal sport protection.

Drill Coton Cloth Adhesive Elastic Bandage

Cotton drill cloth adhesive elastic bandage with aggressive adhesion. Its soft cotton has very good conform ability. It is applied when moderate to maximum strength is necessary.

Features:

1. Cotton elastic material
2. Soft and comfortable
3. heavy and stable stretch
4. Provide moderate to maximum compression, apply properly to avoid cutting circulation
5. Strong and reliable stickiness
6. Constant unwinding tension
7. Leaves no residue on body parts

Application:

Supporting bandages for strains and sprains Fixing bandages for hot, cold packs Pressure bandages to promote circulation and healing Compression bandages to help control swelling and stop bleeding Veterinary bandaging.

KINESIO TAPE,SPORT TAPE

Sports Tape

Product description: the base material is cotton and coated with zinc oxide glue. It is convenient to use.

Instructions: clean your skin before use, tear the tape with required length and stick to the desired part, provides a sports protection

Intend use: mainly used for general sports protection, cannot be applied to the wound directly

Available color: white, skin, red, green and any other colors.

Package: simple packing, shrink packing, blister packing.

Option: different size and color, Brand customization

Storage: the humidity cannot be over 80%, and temperature is(-5-30) °C

Kinesiology Tape

Feature:

1. Comfortable substrate, soft and breathable
2. Allow full range of motion
3. Provide consistent compression, apply properly to avoid cutting circulation
4. Stable stretch and reliable stickiness.

Applications:

1. Supporting bandages for muscles
2. Assists lymphatic drainage
3. Activates the endogenous analgesic systems
4. Corrects joint problems

Available color: white, skin, pink, green, blue, black

Package: simple packing

Option: different size and color, Brand customization

Storage: the humidity cannot be over 80%, and temperature is (-5-30) °C

Shelf life: 2 years

A Safety Instructions

1. In the case of acute injuries or complex disease symptoms, product adhesion should be performed by a doctor or physiotherapist.
2. Do not over stretch the product when attaching it. There should not be excessive constriction.
3. Leave the product on the skin for a maximum of seven days.
4. Do not use in case of skin diseases and irritations.
5. Should hypersensitivity or allergic reactions occur, such as itching, reddening or swelling of the skin where the product is attached, remove the product immediately.
6. Should problems occur while wearing the product, remove the product immediately and consult a doctor.

Adhering Dressing

I.V CANNYLA DRESSING

I.V Cannula Dressing ,Non-Woven

6cm x 8cm

5.1cm x 7.6cm

Spunlace nonwoven fabric coated with acrylic adhesive can stick on the skin firmly, it wil not drop off from the skin when meeting water, it is hypoallergenic and easy to be peeled off.

"U"shaped design style enhances the fixation of the catheter.

Good absorption of pinhole exudate.

I.V Cannula Dressing ,CK Frame Type

Transparent Film Dressing

Transparent film dressing is made of high-permeable polyurethane (PU) film, with high moisture permeable medical degree acrylic adhesive and special coating technology, it can keep normal breath of the skin. It is indicated that: the moisture come from normal human skin is about 240-1800g/m/24h/37°C, if the moisture vapor transmission rate (MVTR) is too low, the moisture may gather under the film, it may cause maceration and influence the adhesive ability of dressing. Transparent dressing has good quality for its both high permeability and excellent viscosity.

Product Description:

1. High permeable polyurethane film (PU): 20-40g/m², thickness 0.015-0.030mm.
2. MVTR of PU with flat coating: 1800g/m²/24h/37°C.
3. MVTR of PU with grid-coating: 3100g/m²/24h/37°C.
4. Hypoallergenic acrylic adhesive: 25-37 g/m².
5. CCK paper, PE or PET protective film.
6. Transparency.
7. Silicon coated paper.

Advantages:

1. High permeability: avoid causing maceration to the skin.
2. Preventing bacteria invasion: diminish the risk of infection.
3. Waterproof: Patient can take shower or bath.
4. Transparent: wound situation could be observed anytime.
5. Soft and comfortable: suit for different body parts, hypoallergenic.
6. Strong viscosity: could keep on skin for 7 days.
7. Safe and convenient: the design of dressing make it easy operation.
8. Various sizes and styles: including paper frame I.V. dressing, new utility-style I.V. dressing, hydrocolloid I.V. dressing, high-permeable grid-coating transparent dressing, PE foam frame I.V. dressing, non-woven I.V. dressing, and could fit to different clinical needs.
9. Easy to use: could prevent wrinkling of dressings (absorbent pad could add to the dressing based on customers' requirements, the pad is with good absorbency, can prevent maceration).

Applications:

1. Fixing I.V. catheter, PICC and CVC etc.
2. Fixing anaesthesia catheter, pulmonary artery catheter, hemodialysis catheter, kidney dialysis and PCA cannula etc.
3. Apply for friction skin or wet skin, such as skin care after trachea incision, care for torus of bone, skin care when gatism, bedsores prevention etc.
4. Apply for slight bruise, cut, suturing wounds, etc.
5. As a secondary fixation.

CCK fram style

At the "U"cut area, the spunlace nonwoven fabric is laminated, to prevent the wrinkle of the film when using, make it more smooth and safer.

CCK frame style decreases extra tension on skin, prevent the skin hurt.

PU film is breathable and transparent, and it is convenient to observe the injection point or the wound healing process.

"U" cut is convenient for fixing I.V. cannula with butterfly or drug kettle.

Extra-thin design is comfortable to the skin.

Special tab design could make the paper frame easier to peel off.

The recorder tape is convenient for recording patient's name, date and Bed No., reinforcing fixing and easy for management.

I.V CANNYLA DRESSING

I.V Cannula Dressing High-Permeable Grid-Coating Transparent Dressing

6cm x 7cm
7cm x 9cm
10cm x 12cm

High-Permeable Grid-Coating Transparent Dressing

Operations steps "1, 2, 3" on release paper and protective film make the products more easy to use

It is extra thin, highly permeable, soft, and elastic for the special grid-coated film. It is 0.01-0.012mm thick.

The breathable adhesive tape on protective film "2" make it easy to record the patient's name, operate time and No. This could be also used to reinforce the fixation and make it easy for management.

I.V Cannula Dressing, New Utility-Type Practical type

6cm x 7cm
10cm x 12cm

The serrated design is easy to peel off the tapes.

Three tapes could be used to fix I.V. cannula and record the name, date, and bed No.

Extra-thin semi-transparent PET protective film make it softer and better appearance.

With mark on the "S" incision of PET, make it easy to use.

Extra-thin film can be completely apply on the skin. The high permeable transparent PU film has good observation for the injection point and wound healing process.

I.V Cannula Dressing ,Hydrocolloid

Special "U" cutting design makes the dressing easy to fit the I.V cannula.

Thicker hydrocolloid frame makes it better adhesive, prevent the dressing roll up from edge.

The releasing film marked with, makes it easy to use.

The thicker island hydrocolloid pad in the center helps to absorb the exudation from the pinhole.

Extra-thin hydrocolloid provide good observation.

6cm x 7cm

10cm x 12cm

Hydrocolloid IV Dressing

Patented hydrocolloid I.V dressing produced by special technology. It has advanced permeability, good absorbency, hypoallergenic, and it can accelerate the healing of I.V. catheter wound and prevent the phlebitis. It is widely used among the patients who have bad skin situation, such as atopic skin, skin with inflammation burn and scald hurt, chronic diseases patients like infants and old people.

Wound Dressing ,Non-Woven Fabric

Wound Care Dressing

Steriled self-adhesive Island dressing is made of nonwoven fabric or highly permeable polyurethane film coated with medical acrylic adhesive, and fabric pad. The dressing can creat a occlusive enviroment for the wound and it is absorbent and permeable.

1. Materials: water repellent spunlace non-woven fabric, spunlace non-woven fabric, water-proof spunlace non-woven fabric (45-50g/m²), and highly permeable PU film (20-40g/m²).

2. The occlusive environment can prevent bacterial invasion and accelerate the wound healing

3. Special hypoallergenic acrylic adhesive: 30-50g/m², good initial, continuous and repeated viscosity, mild peeling strength; no roll up, no drop off against water

4. Advanced coating techniques, excellent permeable, hypoallergenic.

5. Highly absorbent and non-adherent pad. It is easy to peel off and avoid secondary hurt.

6. Waterproof non-woven dressing and PU film dressing are waterproof. It's convenient for patients to take shower.

7. Humanized designed, Available in different shapes and sizes.

Applications:

Care for all kinds of wounds, such as: postoperative wounds, acute and chronic wounds, small cut wounds and bruise wounds.

I.V Cannula Dressing PE Foam

Hydrocolloid I.V Dressing

Patented hydrocolloid I.V dressing produced by special technology. It has advanced permeability, good absorbency, hypoallergenic, and it can accelerate the healing of I.V. catheter wound and prevent the phlebitis. It is widely used among the patients who have bad skin situation, such as atopic skin, skin with inflammation, burn and scald hurt, chronic diseases patients like infants and old people.

Hydrocolloid Dressing

Product Description:

1. There is semi-permeable matte polyurethane or polyurethane foam to enhance the absorbency. Film thickness: 0.025-0.035mm
2. When the thickness of hydrocolloid dressing is 0.4mm thick: Moisture permeability 0.34g/10 cm²/24h/37°C, 1.06g/10 cm²/72h/37°C
3. Hygroscopic ability 2.40g/10 cm²/24h/37°C, 2.46g/10 cm²/72h/37°C
4. Hygroscopic capacity 2.74g/10 cm²/24h/37°C, 3.52g/10 cm²/72h/37°C (only for reference)
5. Hygroscopic capacity: 2.83g/g/24h/37°C, 3.23g/g/72h/37°C (only for reference)
6. PH 5.7 Acid & Alkali Resistance PH 3-12.
7. Hygroscopic capacity and hygroscopic capability can be adjusted according to clinical needs.

Product Performance:

1. Excellent exudates absorption capability.
2. Keep the wound in a moist environment, promote wound healing, effectively release pains and reduce wound care frequency.
3. Water-proof, protect the wound from microbial invasion.
4. Excellent elasticith and self-adhesive, convenient and comfortable to wear.
5. Please change the dressing when it turns white.
6. Easy to peel off, no adherence to wound, so effectively reduce the potential damage and pains.
7. Available in different sizes and shapes to meet the clinical needs.

Foam Dressing

Product Description:
1. The dressing is made of medical polyurethane foam with CMC, including non-adherent foam dressing, foam dressing with polyurethane film, self-adherent foam dressing and silver ion foam dressing.

2. Product thickness: 2-6mm, GSM: 735g/m²/5mm (thickness)

3. The moisture permeability of polyurethane film which laminated on the foam dressing:

1.84g/10cm²/24h/37°C Absorbent capability 6.94g/10cm²/24h/37°C Total absorbent capacitance 8.78g/10m/24h/37°C

4. Hygroscopic ratio≥8

5. Adhesive part of self-adherent foam dressing is made of extra thin hydrocolloid dressing which can enhance wound healing.

Product Performance:

1. High absorbency, it can absorb lots of exudates and reduce maceration to the skin.

2. It has water-lock function.

3. The semi-permeable polyurethane film can protect the wound against water, bacterial and foreign matters.

4. Provide moist environment to promote wound healing

5. Non-adherent to the wound, no pain will occur when remove dressing.

6. It is soft, elastic and comfortable to the skin and has good cushioning.

7. Besides the above functions, silver ion foam dressing is also antibacterial.

8. Available in different sizes and shapes to meet the clinical needs.

Alginate Dressing

Product Description:

1. Good absorbency and gelation capacity.

2. Viscosity coefficient >800cp Ash<0.5%, fiber denier: 1.5D strength: 1.5g/D Elongation> 10%.

3. Water absorption≥10, bacteriostasis ratio>80%. Pieces and strips are available.

Product Performance:

1. It is the mixture of natural seaweed and Calcium ion, and has good biocompatibility.

2. Gel could be formed when the dressing absorbs exudates and blood, it could protect the wound area and promote the wound healing.

3. The dressing has excellent absorbency, it is soft and comfortable.

4. Release of Calcium ion could activate prothrombin, and could stop bleeding effectively.

5. No adherence to the wound, it will protect the nerve terminals, reduce pain and easy to be peeled off.

6. Maceration of the skin around the wound will not occur.

7. It is biologically degradable and environment-friendly.

8. It is soft and can be used to fill the wound cacuna.

2cm x 30cm
2cm x 40cm
5cm x 5cm
10cm x 10cm
10cm x 20cm
15cm x 20cm

Hydrogel Dressing

Product Description:

1. Hydrogel dressing can be classified as liquid hydrogel(debridement gel) and solid hydrogel(hydrogel dressing).
2. 90% content of bridement gel is made of water, and this kind of hydrogel is transparent liquid gel.
3. There is highly permeable coated polyurethane film on the outer layer of self-adherent hydrogel dressing, and the self-adherent hydrogel dressing is waterproof, air-permeable and convenient for use
4. Hydrogel dressing is highly hygroscopic and it can absorb exudates more than 3 times of its own weight.

Product Performance:

- 1.90% of bridement gel is made of water, this can supply water to the wound and at the same time absorb exudates from the wound. Therefore wound will not become dry and dead.
2. Bridement gel can hydrate necrotic tissue, and necrotic tissue can be wrapped, separated and removed via autolysis debridement.
3. It can enable the regeneration of granulation tissue, enhance splitting and migration of epithelium cells, accelerate wound healing and reduce the chance of scar formation.
4. It is soft, comfortable, and elastic, and can reduce pain from the wound. It would not stick on the wound, so there is no secondary damage to the skin.
5. It will not be fragmentized after absorbing exudates.
6. It is transparent, so it is easy to observe the wound directly.
7. There is highly permeable polyurethane film on self-adherent hydrogel dressing, so the self-adherent hydrogel is air-permeable, waterproof, antibacterial, safe, convenient for using.

FIRST AID BANDAGE

Feature:

1. Coating with hypoallergenic adhesive and place absorbent pad on the centre.
2. It is used widely to care in little wound Base material: Non-woven and Comfortable Fabric, Flexible fabric, Tough Strong Fabric and Cotton fabric, Plastic film, Clear PEVA, Sheer, PU and Foam

Silver Ion Dressing

Product Description:

1. Silver ion dressing is antibacterial for many kinds of microorganism and it is not drug-resistant.
2. Silver ion dressing can continuously kill bacterial and virus, and this can last for 5-7 days.
3. Discharging of silver ion is related to the wound situations. More exudates, silver ion discharging.

Product Performance :

1. Highly effective and permanent antibacterial ability, and it can kill kinds of pathogenic microorganism.
2. It can protect the wound from bacterial penetration.
3. It can promote wound healing and reduce scar formation.
4. It will not stick on the wound, and no pain when the dressing is changed.

Secondary damage to the wound will not happen.

Economical non fluff design. Only several layered tissues
Spunbond nonwoven topsheet allows to pass quickly into the core
Diamond-embossed pattern for utilization and water spreading quickly
Polyethylene backsheet protects against leakage.

Disposable Infusion Set and surgical items

Specification:

The cap of spike MSYBO2 with air vent and air filter, The drip chamber #14.3X50,with infusion filter#12.8, the regulator with blue wheel (ABS), latex injection bulb (MZS03) , luer slip connector,with injection needle 21GX1 1/2" , Catheter 1.5M

Specification:

The cap of spike MSYBO2 with air vent and air filter, The drip chamber #14.3X50,with infusion filter#12.8, the regulator with blue wheel (ABS), Y-connector(MST01),luer slip connector,with injection needle 21GX1 1/2" , Catheter 1.5M

Specification:

The cap of spike for in domestic market with air vent and air filter,The drip chamber for in domestic market, big connector, and small connector, the regulator with blue wheel (ABS),luer injection bulb(MZS04), luer slip connector,with injection needle 22GX1 1/4" Catheter 1.24M

specification:

The cap of spike MSYBO1 with air vent and air filter, The drip chamber #15.5X54,with infusion filter#13.2, sheep's angle of the regulator with blue wheel (ABS), latex injection bulb(MZS03), luer lock connector,with injection needle

Specification:

The cap of spike SYB04 with air vent and air filter, The drip chamber #15.5X54, the small regulator with white wheel (ABS), Y-connector (MST02), luer slip connector, with top, Catheter 1.5M (flexibility)

Specification:

The cap of spike needle #16 (white) with air vent and air filter of the catheter 0.25m, Top cap of drip chamber, The drip chamber #15.5 X 54, with infusion filter#13.2, the regulator with blue wheel (ABS), latex injection bulb (MZS03) , luer slip connector,with injection needle 21GX1 1/2" , Catheter 1.5M

Specification:

The cap of spike needle #20 (white)with air vent and air filter of the catheter 0.25m, The both top c a p of drip chamber with latex cap .The drip chamber #15.5 X 54, with infusion filter#13.2, the regulator with blue wheel (ABS), latex injection bulb (MZS04) , luer slip connector, with injection needle 21G X 1/2" , Catheter 1.5M

Specification:

The cap of spike MTKC-01, The drip chamber MTKD-01, the regulator with blue wheel (ABS), latex injection bulb (MZS04) , luer slip connector, with injection needle 21G X 1 1/2" , Catheter 1.5M

Specification:

The cap of spike MSY'BO3 with air vent and air filter, The drip chamber #15.5X62, with infusion filter#14.2, sheep's angle of the regulator with blue wheel (ABS), latex injection bulb (MZS03), luer lock connector,with injection needle 21GX1 1/2" , Catheter 1.5M

Specification:
The cap of spike SYBO6 with air vent and air filter, The drip chamber #16.3X64 with infusion filter#14.2, sheep's angle of the regulator with blue wheel (ABS),-connector(ST01), luer lock connector, with injection needle 21G X 1 1/2", Catheter 1.5M

Specification:
The cap of spike MSYBO6 with air vent and air filter, The drip chamber #16.3X64,with infusion filter #14.2, sheep's angle of the regulator with blue wheel (ABS), Y-connector(MST02), luer slip connector,with injection needle 21GX1 1/2", Catheter 1.5M

Specification:
The cap of spike MSYBO6 with air vent and air filter, The drip chamber #16.3X72,with infusion filter #14.3, sheep's angle of the regulator with blue wheel (ABS),latex injection bulb(M2ZS03), luer lock connector, with injection needle 21GX1 1/2",Catheter 1.5M

Disposable Infusion Set, Light-proof

Specification:
The cap of spike MSYBO6 with air vent and air filter, The drip chamber #16.3X64,with infusion filter #14.2, sheep's angle of the regulator with blue wheel (ABS), luer lock connector,with injection needle 21GX1 1/2", Catheter 1.5M

Specification:
The cap of spike MSYAQ3, The drip chamber #14.3X50 with infusion filter #12.8, the regulator with blue wheel (ABS), latex injection bulb (M2ZS03), luer slip connector,with injection needle 21GX1 1/2", Catheter 1.5M

Specification:
Specification: The cap of spike MSYAO7 ,The drip chamber #15.5X54 with infusion filter#13.2, the regulator with blue wheel (ABS), latex injection bulb (M2ZS03), luer lock connector,with injection needle 21G X1 1/2",Catheter 1.5M

Specification:
The cap of spike , The drip chamber for in domestic market,small connector, the regulator with blue wheel (ABS), latex injection bulb(M2ZS04), luer slip connector,with scalp vein sets 22G, Catheter 1.5m

Specification:
The cap of spike MSYA03, The drip chamber #14.3 X 50,with infusion filter#12.8, aluminium binder, Y-connector(MST02), luer slip connector,with cap, Catheter 1.5M

Pore diameter of medium	Effective filtering area	Characteristics of application
5um	6.15 cm ²	Mainly applied to intravenous transfusion of clinical traditional Chinese medicine and antibiotic preparations, and may reduce the occurrence of pyrogen reaction of intravenous transfusion.
3um	6.15 cm ²	Mainly applied to intravenous transfusion of pungent drugs including clinical potassium chloride and fructose, etc., with an effective rate over 76% of reducing the ache resulting from transfusion.
3um	11.3 cm ²	Mainly applied to intravenous transfusion of pungent drugs including clinical mannitol, etc., and be good for alleviating the local swelling of patients limb vessels in transfusion
Packing material and specification:		Paper-plastic package, 300 pieces/box.

Infusion Set with Burette

Specification:
The cap of spike MSXB01 with air vent and air filter, The drip chamber #17.3 X98, with blood filter #17.3X62, the regulator with red wheel (ABS), latex injection bulb (MZS03) , luer slip connector, with injection needle 18G X 1 1/2", Catheter 1.5M

Specification:
The cap of spike MSXA01, The drip chamber #17.3X98,with blood filter #17.3X62, the regulator with red wheel (ABS),luer slip connector, with injection needle 18G X 1 1/2", Catheter 1.5M

Specification:
The cap of spike MSXB01 with air vent and air filter, The drip chamber #17.3 X98,with blood filter #17.3X62, sheep's angle of the regulator with red wheel (ABS),Y-connector (MST01) . luer lock connector, with injection needle 18G X 1 1/2", Catheter 1.5M

Specification:
The cap of spike MSXA01, The drip chamber #17.3 X 98, with blood filter #17.3 X62, sheep's angle of the regulator with red wheel (ABS), luer lock connector,with injection needle 18G X1 1/2", Catheter 1.5M
Disposable Blood Transfusio

Specification:
The cap of spike needle #20 with air vent and air filter of the catheter 0.25m, high-temperature synthesis of the drip chamber with blood filter, sheep's angle of the regulator with red wheel (ABS),luer slip connector, with injection needle 18G X1 1/2", Catheter 1.5M

Specification:
The cap of spike needle #16 with air vent and air filter of the catheter 0.25m, high-temperature synthesis of the drip chamber, with blood filter, sheep's angle of the regulator with red wheel (ABS),luer slip connector, with injection needle 18G X1 1/2", Catheter 1.5M

structure & properties of products

Main structure of sterile auto disable syringe for single use: RPF, barrel, plunger, piston and its barrel and piston are in interference fit, so as to make sure of seal.

RPF : Such syringe has been in a design that RPF will start all by itself just after it has been used in order to prevent it from reusing.

Barrel of the auto disable syringe is transparent to observe solution and read its measure through surveyor's rod graduation on it. And its top is designed as RPF area.

Both barrel and plunger of the auto disable syringe are made from biomedical polymer material whose biocompatibility conforms to standards.

Model of auto disable syringe: luer slip, luer lock

Specifications:1ml, 2ml, 3ml, 5ml, 10ml

Disposable auto-destruct Syringe,Luer slip/centre.with needle, Blister packing IML

Disposable auto-destruct Syringe,Luer slip/centre. with needle,Blister packing 2ML

Auto disable syringes for fixed dose immunization, fixed needle,Blister packing 0.2ML

Auto disable syringes for fixed dose immunization, fixed needle,Blister packing 0.3ML

Auto disable syringes for fixed dose immunization, fixed needle,Blister packing 0.4ML

Auto disable syringes for fixed dose immunization, fixed needle,Blister packing 0.5ML

Main structure of sterile safety syringe: RPF, barrel, plunger, piston and its barrel and piston are in interference fit, so as to make sure of seal. RPF; RPF as well as feature of manual operation will start Spontaneously in order to prevent it from reusing. Meanwhile, it is able to prevent it from hurting people by covering hypodermic needle with barrel.

Barrel of the sterile safety syringe is transparent to observe solution and read its measure through surveyor's rod graduation on it. And its top is designed as RPF area.

Both barrel and plunger of the auto disable syringe are made from biomedical polymer material whose biocompatibility conforms to standards. Model of sterile safety syringe: luer lock.

Specifications:1ml, 2ml, 3ml, 5ml, 10ml

Disposable safety (auto-destruct) Syringe,Luer lock,with needle, Blister packing

Description

Coated, Braided synthetic absorbable sutures are composed of the homopolymer of glycolic acid. Sutures retain approximately 65% of the original tensile strength at two weeks and approximately 35% of at three weeks post-implant. Sutures are essentially complete between 60 and 90 days.

Colour

Violet and Undyed.

Range

Gauge sizes 6/0 to 2# (USP).

Storage methods

Store between 25°C-30°C and store in dry place. Don't use damaged packages.

Sterilization methods

Ethylene oxide.

Polyglycolic Acid

Sterile Surgical Atraumatic with Thread

Description

short-term synthetic absorbable surgical braid made of Rapid polyglycolic Acid. Rapid Polyglycolic acid is coated with polycaprolactone and calcium stearate. The retention strength of Rapid Polyglycolic acid is about 45% of the initial strength after 7 days at 37°C. Absorbable outures are essentially complete at 42 days.

Colour

Violet and undyed.

Range

Gauge sizes 6/0 to 2#(usP).

Storage methods

store between 25°C-30°C and store in dry place,

Don't use damaged packages.

Sterilization methods

Ethylene oxide.

Sterile Surgical Atraumatic with Thread

Description

For easy handling and secure knot tying. For smooth passage through tissue and easy knot tie down. For minimal tissue reaction. By hydrolysis complete between 56&70 days. Always predictable and reliable. High initial strength and strength retention for up to 28 days.

Colour

Violet and undyed.

Range

Gauge sizes 8/0 to 24 (USP).

Storage methods

Store between 25°C-30°C and store in dry place.

Don't use damaged packages.

Sterilization methods

Ethylene oxide.

Sterile Surgical Atraumatic with Thread

Description

Provides prolonged tensile strength retention in tissue. Smooth surface will not support bacterial growth, Elicits only minimal tissue reaction.

Higher co-efficient of surface friction than other synthetic monofilament materials gives much improved security,

Stronger than other synthetic monofilament suture materials of similar size.

Sterile Surgical Atraumatic with Thread

Description

Complies with BS7252 part 1. providing supple "hand" while retaining high tensile strength.

Multifilament and monofilament available.

Provides prolonged tensile strength retention in tissue.

Colour

Silver

Multifilament range

Gauge sizes 5/0, 4/0, and 3/0.

Gauge sizes 1 to 7.

Storage methods

Store between 25°C-30°C and store in dry place.

Don't use damaged packages.

Sterilization methods

Gamma radiation

Stainless Steel Wire

● Lancing Device

• Uncuffed

Feature:

- Made from non-toxic PVC. transparent soft and smooth.
- Radio opaque line through the length for X-ray visualization

Size ID (MM) : 2.0 | 2.5 | 3.0 | 3.5 | 4.0 | 4.5 | 5.0 | 5.5 | 6.0 | 6.5

Size ID (MM) : 7.0 | 7.5 | 8.0 | 8.5 | 9.0 | 9.5 | 10.0

● Lancing Device

● Blister Kit For Lancing Device And Lancets 10 pcs-25 pcs

● Surgical Blades

• Cuffed

High volume low pressure cuff

Feature:

- High volume cuff provides positive tracheal wall seal
- Designed for use during short and long-term ventilation and routine surgical procedures
- Available with Murphy eye only

Size ID (MM) : 3.0 | 3.5 | 4.0 | 4.5 | 5.0 | 5.5 | 6.0 | 6.5

Size ID (MM) : 7.0 | 7.5 | 8.0 | 8.5 | 9.0 | 9.5 | 10.0

Low profile cuff

Feature:

- Low profile cuff for short-term surgical intubation
- Low profile cuff minimizes capillary restriction
- Tapered cuff design eases insertion and minimizes risk of herniation

Size ID (MM) : 3.0 | 3.5 | 4.0 | 4.5 | 5.0 | 5.5 | 6.0 | 6.5

Size ID (MM) : 7.0 | 7.5 | 8.0 | 8.5 | 9.0 | 9.5 | 10.0

High volume low pressure cuff

Feature:

- Special PVC blend for enhanced softness and soft atraumatic tip, nasal surgical intubation only
- High volume low pressure cuff provides positive tracheal wall seal and reduces area of tracheal wall contact and minimizes capillary restriction

Size ID (MM) : 5.5 | 6.0 | 6.5 | 7.0 | 7.5 | 8.0

Oral Preformed Tube

• Uncuffed

Feature:

- Made from non-toxic PVC, transparent, soft, smooth
- X-ray through the whole tube

Size ID (MM) : 3.0 | 3.5 | 4.0 | 4.5 | 5.0 | 5.5 | 6.0 | 6.5

Size ID (MM) : 7.0 | 7.5 | 8.0 | 8.5 | 9.0 | 9.5 | 10.0

Reinforced Endotracheal Tube

• Uncuffed

Feature:

- Made from non-toxic PVC, uncuffed.
- Spiral reinforcement minimizes crushing or kinking
- Flex conform to any patient position, Especially OPS of decubitus

Size ID (MM) : 3.0 | 3.5 | 4.0 | 4.5 | 5.0 | 5.5 | 6.0 | 6.5

Size ID (MM) : 7.0 | 7.5 | 8.0 | 8.5 | 9.0 | 9.5 | 10.0

High volume low pressure cuff

Feature:

- Material: non-toxic PVC, available with high volume low pressure cuff
- X-ray through the whole tube. tubes available with Murphy eye

Size ID (MM) : 3.0 | 3.5 | 4.0 | 4.5 | 5.0 | 5.5 | 6.0 | 6.5

Size ID (MM) : 7.0 | 7.5 | 8.0 | 8.5 | 9.0 | 9.5 | 10.0

• Cuffed

High volume low pressure cuff

Feature:

- Made from non-toxic PVC, Available with high volume low pressure cuff
- It provides positive tracheal wall seal
- Flex conform to any patient positions, especially to OPS of decubitus

Size ID (MM) : 4.0 | 4.5 | 5.0 | 5.5 | 6.0 | 6.5

Size ID (MM) : 7.0 | 7.5 | 8.0 | 8.5 | 9.0 | 9.5

Nasal Preformed Tube

• Uncuffed

Feature:

- Made from non-toxic PVC
- X-ray through the whole tube
- Nasal surgical intubation only

Size ID (MM) : 5.0 | 6.0 | 6.5 | 7.0 | 7.5 | 8.0

Reinforced Endotracheal Tube

Low profile cuff

Feature:

- Made from non-toxic PVC, low profile cuff
- Spiral stainless steel wire inside
- Flex conform to any patient positions, especially to OPS of decubitus

Size ID (MM) : 3.0 | 3.5 | 4.0 | 4.5 | 5.0 | 5.5 | 6.0 | 6.5

Size ID (MM) : 7.0 | 7.5 | 8.0 | 8.5 | 9.0 | 9.5 | 10.0

Disposable Tracheal Tube kit

Feature:

- Laryngoscope can be selected
- All kinds of tubes can be configured according to your requirements

Without Laryngoscopes	Tracheal Tube Stylet

Oxygen Mask

Feature:

- Made from clear soft PVC. 100pcs/box
- Adjustable nose clip assures comfortable fit.
- 210 CM Oxygen supply tubing is available

Type
Adult with tubing
Adult without tubing
Adult elongated with tubing
Adult elongated without tubing
Pediatric with tubing
Pediatric without tubing
Pediatric elongated with tubing
Pediatric elongated without tubing

Multi-vent Mask

Feature:

- Made from clear soft PVC
- Convenience to adjust the concentrator of the oxygen
- Available with 210cm oxygen supply tubing

Type
Adult standard
Adult elongated
Children standard
Children elongated

Non-Rebreath Mask

Feature:

- Made from clear soft PVC
- The PVC breathing bag is available
- Available with 210cm oxygen supply tubing

Type
Adult standard
Adult elongated
Children standard
Children elongated

Venturi Mask with Six Diluters

Feature:

- Made from medical grade PVC
- Available with 7 anti-crush tubing.
- Tubing length could be customized

Type
Adult XL
Adult L
Pediatric M
Infant S

Nebulizer with Aerosol Mask

Feature:

- Made from clear soft PVC
- 6ml and 20ml nebulizer jar is available

Type
6ml Nebulizer jar (adult standard)
6ml Nebulizer jar (adult elongated)
6ml Nebulizer jar (Pediatric standard)
6ml Nebulizer jar (Pediatric elongated)

Nebulizer with Mouth Piece

Feature:

- Made from non-toxic ABS and PVC
- 6ml and 20ml nebulizer jar is available

Type
6ml Nebulizer jar with mouth piece

Nebulizer

Feature:

- Made from clear PP
- Available with nebulizer jar of 6ml or 20ml

Volume
6ML

Mouth Piece and "T" Piece

Feature:

- Made from non-toxic ABS, without nebulizer and Oxygen tubing
- Can connect to 6ml and 20ml nebulizer

Aerosol Mask

Feature:

- Made from clear soft and non-toxic PVC
- 6ml and 20ml nebulizer can be connected
- Without nebulizer and Oxygen tubing

Type
Adult standard
Adult elongated
Pediatric standard
Pediatric elongated

Tracheotomy Mask

Feature:

- Made from clear clear PVC
- Helix connector

Type
Adult
Children

Air Cushion Mask

Feature:

- Made from clear soft PVC
- Air cushion assures comfortable face fitting

No Additive Tube

The no additive tubes are applicable to the immunochemistry,immunology,serumology and all kinds of virus tests as well as the blood sampling and storage in blood collection stations .The tube walls are specially processed for preventing the sticking and hemolysis , which is not only blood sampling tubes but also the test tubes.

ESR Tube

The tubes are specially used for determination of the erythrocyte sedimentation rate (ESR) by the Westergren's Method .The mixing ratio is 1 part citrate solution to 4 parts blood .ESR measurements refer to the Westergren method.

ESR Tube

The tubes are specially used for blood sampling for determination of the erythrocyte sedimentation rate (ESR) by the Westergren Method.

Heparin Tube

The heparin tubes are used for blood sampling in clinical biochemistry ,@ Vacuum Blood Tube emergency care biochemical and hemorrheological test.

Color Code : Green

Specifications: *13x75mm , *13x100mm

General Sampling Dosage: 2ml,3ml,4ml,5ml,6ml,7ml.

Types of Additives :Sodium Heparin, Lithium Heparin

Maximum Centrifugal Speed:5000 turns/min

Maximum Vacuum Tolerance: +10%

Attention :During the Operation , do please care for the followings:

1.Soon after the sampling ,turn the tube 180°upside down ,shaking and mixing 5-6 times.

2.Sample the dosage as required in order to avoid the inability of the determination of the calcium due to the relative higher content of the heparin.

3.Heparin Anti-coagulation Blood sample should be used within 6 hours after sampling , otherwise ,the blood will coagulate again.

Pro-Coagulation Tube c 6 01 23

The tubes are used for the blood sampling for biochemical .immunization test

* Vacuum Blood Tube .The internal walls are coated with the anti-wall sticking agent and meanwhile

add the pro-coagulant, which has the characters of temperature flexible ,fast coagulation ,fibrin never recur .

Color Code :Nacarat

Specifications: *13x75mm , *13x100mm

Normal Sampling Dosage:2ml,3ml,4ml,5ml,6ml,7ml.

Coagulation Time :10~30 Minutes

Maximum Centrifugal Speed:5000 turns/min

Operation Temperature: 0°C ~ 37°C

Maximum Vacuum Tolerance: £10%

Clotting Time : When the platelets are normal , the coagulation time is not more than 5 minutes.

Attention :

1.Soon after the sampling ,turn the tube 180°upside down ,shaking and mixing

PT Tube

PT tubes are applicable to the checks for blood coagulation . The vacuum tubes are designed according to the 1:9 proportions of anti-coagulants and blood samples . It can ensure an accurate blood dosage and anti-coagulants quantity as well as the high precision . Because the low toxicity of the sodium citrate , it can also be used to the blood storage.

Color Code : Blue

Specifications: *13x75mm

General Sampling Dosage: 1.8ml.2.7ml.

Types of Additives :3.28% sodium citrate

Operation Temperature:0°C~ 37C

Maximum Vacuum Tolerance: 5%

Attention :During the operation, care for the followings:

1.soon after blood sampling ,mixing it 5-6 times by turning the tube 180°.

2.sampling the dosage as required to ensure the test accuracy

3.this tube is suitable to fix the double direction flexible needles

Gel and Clot Activator Tube

The tubes are applicable to blood serum biochemical test, immunization test ,and drug test etc. the internal walls are coated with pro-coagulant which shorten the coagulation time significantly . Using the imported separation gel to prevent the protein in serum from adhesion and maintain a stable status . The centrifuged separation gel is solidified and forming a barrier to separate the serum from blood red cells and stop the exchange of the substances between them. Thus obtain the high quality serum.

Color Code :Yellow

Specifications: *13x75mm , *13x100mm

Normal Sampling Dosage:2ml,3ml,4ml,5ml,6ml.

Complete Coagulation Time :10~30 Minutes

Maximum Centrifugal Speed:5000 turns/min

Operation Temperature: 0°C ~37C

Maximum Vacuum Tolerance: 10%

Oxalate Tube

The tubes are applicable to the blood samples test on the aspects of blood sugar ,sugar tolerance ,red blood cell electrophoresis ,Alkali-Resistant HB Determination ,and sugar dissolution. Due to the add of the inhibitor and special process of the internal tube walls, it can maintain the blood original characters for a long time , and the metabolism of the RBC relative ceased.

Color Code :Gray

Specifications: *13x75mm , *13x100mm

Normal Sampling Dosage:2ml,3ml,4ml,5ml.

Types of Additives :Sodium Fluoride + Potassium Oxalate

Sodium Fluoride +Sodium Heparin

Maximum Centrifugal Rotating Speed:5000 turns/min

Maximum Vacuum Tolerance: s5%

Attention :Because the Sodium Fluoride has a good effect of preventing the blood sugar from degradation, turning the tube 180°upside down ,shaking and mixing 5-6 times slowly.

EDTA Tube

The tubes are applicable to the clinical blood test and suitable for the blood cells analysis . The internal walls of the tubes are coated with the anti-sticking agent, and meanwhile add the anti-coagulant. EDTA anti-coagulant has low effects on the blood cell integration and blood cells configuration ,which can restrain the platelets integration.

Color Code :Purple

Specifications: *13x75mm

General Sampling Dosage:2ml,3ml,4ml,5ml.

Type of additives :EDTAK2,EDTAK3,EDTANa2

Operation Temperature: 0°C ~ 37°C

Maximum Vacuum Tolerance: +10%

Sharp Container

Micro Blood Tube

Micro blood tubes are utilized to sample small amount of blood from patients.

Micro blood

tube caps are color coded in accordance with international standards and have a capillary inserted in a cross cut.

Micro blood tubes are convenient, safe , disposable and efficient.

Micro blood tubes have volume graduation to ensure that right amount of blood and additives are combined. They are designed for Nursing and Medical Technician personnel to obtain blood samples from patients who are difficult to draw blood from.

Hemodialyizer

Low Flux Hemodialyzer

Features

1. High Hydraulic permeability
2. Lower resistance membrane
3. Higher permeability for meddle to large size molecules
4. Excellent blood compatibility

High Flux Hemodialyzer

Features

1. High Hydraulic permeability
2. Lower resistance membrane
3. Higher permeability for meddle to large size molecules
4. Excellent blood compatibility

A.V. Fistula Needle

Features

1. Fine polishing process on blade o puncture easily and smoothly.
2. Siliconised needle reduces pain and blood coagulation.
3. Back eye and ultra thin-waled ensures o high blood flow rafe.
4. Rofatable wing and fixed wing are available.

Blood Line

Features and benefits

All fupes are made from medical grade, and all compenents are manufactured in original

1. Pump Tube: With high elasticity and medical grade PYC; the shape of the fube remains the some after confinuous pressing of 10 hours.
2. Drip Chamber: several sizes of drip chomber avclble.
3. Dialysis Connector: Extra large designed dialyzer connector i easy to ofef .
- 4.Clamp: clamp is made of hard plasic and designed larger and thicker to guarantee sufficient stop.
5. Infusion Set: It s convernt to install and uninstal. which ensure precision infusion and safe priming.
6. Drainage Bag: closed priming fo meet the reuiements of quality control, single way drainage bag and double woy drainage bag available.
7. Customized Designed: Different sizes of pump fube and drip Chomber fo meet the requirements of customers.
